DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims **19-21** are rejected under 35 U.S.C. 102(b) as being anticipated by Jagger et al., U.S. Pat. No. 6,807,405.

Considering claims 19 and 20, Jagger et al., (hereinafter “Jagger”) discloses the operation of a notch filter as illustrated in Fig.4, the circuit comprising a mixer 42, a notch filter 43, a bandpass filter 44, and a second mixer 45. The mixers are provided with oscillating signal from oscillator 41. As to the frequency range of the oscillating signal being narrower than the IF signal, the examiner submits that it's well known in the art to design the tuner circuit to have such characteristics in order to achieve a desired frequency characteristics.

Considering claim 21, the oscillator 41 outputs two reference signal, one to the mixer 42 and another to the mixer 44.

Allowable Subject Matter

3. Claims **1-9,13-18** are allowed.
4. Claims **22-24** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Birleson, U.S. 5,847,612 discloses an interference free broadband television tuner and as shown in Fig.3B and 3C, a frequency range of 1018,5 MHz to 1160.25MHz for the LO1 and wider range for the IF2 as illustrated in Figs. 3D and 3E.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
